Child health (0-6) - Better Health Channel

Positive Reinforcement March 23, 2012 Rarely does a child wake up and think of ways to annoy the parents. Most children, and adults, want to hear praise. It feels good to be reminded of the many good things we do every day.

Ages & Stages

At this age, a child's brain is still developing the ability to judge distances and the speed at which a vehicle are travelling. And children develop differently. Knowing this will help parents and carers to make decisions about what a child who's becoming increasingly independent can and can't do safely on their own.
