How do I display solutions step by step? For instance, how do I get Matcad to display the cross product of two vectors and show me the final solution in the form (a x b / la x bl) not in vector column form but as a whole fraction?. I can see a result in matrix column form by using the symbolic operator, ->. But the explicit operator doesn't return a numerical solution.

It is a step that invites the group to reflect on what the past can teach us about the focus person's gifts and capacities. It chronicles what has and has not worked in the past and what the story so far tells us about things we may need to do differently in the future. This step also gives a sense of the present situation of the focus person.
