If you downloaded the JDK with the NetBeans IDE, start NetBeans, and begin programming. You can also program using a simple text editor, and compile and run from the command line. Many text editors now come with the ability to run and compile Java files, but you may need to tell the program where javac.exe and java.exe reside on your computer. Use the Windows Find command, if

Awesome way to start out with Java. The only thing about this book is that it is geared towards complementing 1st year CS courses rather than purely self-taught programming. I'm of the latter so I did some additional work to make sure I knew each concept well enough and learn the relevant material for today's Java ecosystem.

When you start a new Java program you must first write a class declaration to contain your Java code. Class declarations are very important in the Java language, and when you progress to more advanced programming techniques you will learn a great deal more about them. For now, simply think of a class declaration as a container for Java code.
