Pars Plana Vitrectomy - EyeWiki

The first step is to perform a core vitrectomy to debulk the central vitreous (see the video below). This can be performed under direct visualization with the microscope. In patients with phakic eyes, the vitreous cutter should not be positioned too anteriorly, and the midline should not be crossed with any instrument, because this can cause ...

Pars Plana Vitrectomy: Overview, Indications

...

Removal of vitreous gel (Vitrectomy) is done to repair many of the retinal disorders, which were previously considered inoperable. The procedure is done through three tiny incisions in the eye for three separate instruments. These incisions are placed in the pars plana of the eye, which is located between the iris and retina.

The Smart Traveler Enrollment Program (STEP) is a free service to allow U.S. citizens and nationals traveling and living abroad to enroll their trip with the nearest U.S. Embassy or Consulate.

Smart Traveler Enrollment Program
What To Expect After A Vitrectomy. Because so many variables are involved, only your eye surgeon familiar with your condition can give you a realistic idea of what to expect following a vitrectomy. But the underlying reason for the procedure usually is a major factor in determining how fast you will recover as well as the ultimate outcome.
